## FOOD

Conveyor belts for the food industry

[www.visgmbh.eu](http://www.visgmbh.eu)

# OUR PRODUCTS

have the following characteristics:

- FDA und EU compliance
- Oil and grease resistant
- Small drum diameter or knife edge
- Outstanding release properties
- Easy and quick cleaning
- High temperature resistant
- Edge sealing

In all areas of the food industry **VIS** conveyor belts prove to be an outstanding solution. We as a manufacturer understand the high level of requirements in this field. Whether in the bakery industry, manufacturing of confectionary or meat or fish processing industry, silicone, PU, PE and PVC are approved and sustainable materials for our products. These materials fulfil the hygiene and logistical requirements in the manufacturing of food in accordance with FDA and EU regulations.

Our high degree of flexibility allows for bespoke product solutions tailor-made for you!

New in our product range are detectable PU bands for conveyor belts!

## HIGH-CONTRAST BLUE

Blue conveyor belts are ideally suited for the hygienic transport of unpackaged food, but also for use in sorting processes and packaging equipment.

This shade of blue is not found in natural foods; therefore, on blue conveyor belts it is much easier to identify contaminations than on conventional white or beige belts. Additionally, the reduced light reflection ensures more safety in your production processes.

## AREAS OF EXPERTISE

-  Meat, fish and poultry
-  Confectionary, bakery and pastry goods
-  Dairy products such as cheese, yoghurt and butter
-  Fruit and Vegetables
-  Sugar
