

Remarks:

For all listed products technical data sheets are available on request.

The minimum pulley diameters are determined at room temperature.

They are valid for endless heated joinings and correspond to VIS' recommended joinings.

Conveyor belts with profiles require larger pulley diameters.

The responsibility for the correct product selection is at the customer.

For damage which results from a wrong use of the product, VIS GmbH does not take any responsibility.

Keep conveyor belts cool, dry and clean. Protect against dust, direct sun light (UV radiation) and humidity.

Technical specifications to change without notice.
